

2025

LEGISLATIVE PRIORITIES

To advance an equitable energy transition in the Pacific Northwest

Tribal Energy Pathways

In collaboration with leaders from several Tribes we are advocating for Washington funding so that Tribes can hire and train clean energy staff.

We are working to get the proposal added to the State Capitol Budget.

Rental Home Heat Pumps

We are working to ensure that renters have cooling equipment to keep them safe through extreme weather and have access to grants and rebates for heat pumps in new and existing rental housing.

Weatherization Pilot

This pilot will test innovative ways that weatherization agencies can help low-income families manage weatherization upgrades, to ensure homes are safe, climate-ready and efficient.

TAKE ACTION**

Making Energy Work

Rural and Tribal communities in Oregon already experience some of the harshest impacts of the climate crisis. Microgrids serve the dual purpose of building local resilience and cleaning up our energy supply. Along with Sustainable Northwest and the Making Energy Work coalition, we are advocating to make building community microgrids easier for rural and Tribal communities.
