

Spark Northwest

Founded in 2001, Spark Northwest accelerates the shift to clean energy one community at a time. Spark Northwest programs make affordable, locally-controlled clean energy more accessible for all. Through renewable energy projects and policy reform, Spark Northwest envisions a region powered by clean energy.

Corporate Changemakers

Join Spark Northwest's Corporate Changemakers and power the work of tomorrow. Corporate Changemakers are the companies and institutions taking a stand on the issues facing our planet today, investing in our bold and meaningful programs through a marketing partnership.

Sponsorships from our Corporate Changemakers allow us to demonstrate support from the business community to our constituency. By making a corporate contribution at any level you are signaling to your clients, staff, and partners that you value environmental sustainability and local economic resiliency. *Sponsorship does not impact program participation or selection.

Your support will help us:

- Spark equitable local clean energy development
- Deepen our programs to be inclusive of all income levels and promote equitable clean energy deployment
- Scale up to deliver new programs and expand on successes, including Solarize Northwest, one of our most impactful programs
- Bring programs to rural areas with an emphasis on business development and local economic investment through renewable energy

Through a corporate sponsorship, you are demonstrating your commitment to a healthy future for all people. Spark Northwest will work with your marketing team to ensure that your sponsorship is publically recognized, and that our constituency understands the value of your work.
